

MOTION® BY XPLOR**E**™ R12-SERIES COMPANION KEYBOARD

ACCESSORY SPECIFICATIONS

The innovative design of the R12-Series Companion Keyboard features an ultra-thin wireless keyboard and a foldable kickstand. When not in use the kickstand folds away and the keyboard magnetically attaches to the rear of the tablet providing a low profile way to transport and charge the device.

The R12-Series Companion Keyboard features EasyPair™ technology which allows a user to securely pair the keyboard to the tablet by simply placing the keyboard on the rear of the tablet. There is no need to enter a pairing code which saves time and removes the need to manage multiple keyboards.

The Companion Keyboard features a capacitive touchpad that not only works as a mouse, but also recognizes Windows gestures for efficient navigation. The thoughtful design of the Companion Keyboard provides users with a comfortable and efficient typing experience when needed.

KEY FEATURES

- Magnetically attaches to the rear of the tablet
- Kickstand converts into an easel for a comfortable viewing angle
- Keyboard and tablet automatically pair with EasyPair™ technology
- Keyboard charges when attached to the rear of the tablet
